

Emergency Sanitation Project

SPEEDKITS

IRC IN COLLABORATION WITH WASTE AND RED CROSS NL

INVITATION LUNCH MEETING

FAECAL SLUDGE MANAGEMENT INNOVATIONS

Thursday 17 April 2014 time: 1230-1400h

Location **International Water House, Bezuydenhoutseweg 2, The Hague** (opposite main entry Min of Foreign Affairs); Ground floor room

WASTE, The Netherlands Red Cross, UNESCO-IHE and the partners in the ESP project and S(P)EEDKITS implement a research project on innovation in sanitation in emergency situations. The focus is on raised latrines, latrine/pit emptying and faecal sludge treatment. There is a wide interest to learn about these research findings, their effective application in emergency situations and in non-emergency situations, i.e. urban, small towns and rural areas; and the re-use of the treated faecal sludge for productive purposes.

Knowledge institutes, NGOs and private sector are invited to participate in this lunch meeting, either physically or through Skype (or GoToMeeting); please communicate to Mrs. Marion Giese (giese@irc.nl) if you are interested to join.

Tentative programme:

Time		
1215-1230	Welcome	IRC
1230-1240	Introduction and typology settlements	Jo Smet, IRC
1240-1255	Innovations in latrine emptying in emergency situations	Jan Spit, WASTE/ Jan Heeger, NL Red Cross
1255-1310	Innovations in faecal sludge treatment in emergency situations	Jan Spit, WASTE/ Happiness Nobela, UNESCO-IHE
1310-1325	Overview of present methods, technologies and challenges in emptying and faecal sludge management in cities, towns and rural areas	Erick Baetings, IRC
1325-1400	Discussion on innovations and applications	Facilitated by IRC
